E-mail: artrich999@aol.com

NOTE: For the first time **DELTA ▲ PRESS** is offering “N” scale decals. They are now available for the GM&O S1, S2 and the RS2, RS3 motors. If they are successful we will offer other sets. We are also contemplating offering “O” scale decals but have not made a final decision. Please let us know your interests in decals and we’ll try to offer them, if feasible. Use the e-mail address above to give us your thoughts.

Gulf, Mobile & Ohio

DELTA ▲ PRESS decals have been designed, developed and researched to be the most accurate and most complete decal sets ever created for the equipment covered by the decals. An extensive collection of photos was the basis for the artwork for the decal sheets. We have made every attempt to validate the content before making them available. *If you discover any errors or omissions, please bring them to our attention, citing the error and giving the photo subject, location, date, and photographer. We will make appropriate changes on the next run of the decals.*

The GM&O decal sets previously offered by David Johnston are included. These sets were developed a number of years ago and most have been updated and have had minor changes made to them. New sets have been developed and others will be announced when available. Listed below are the currently available sets.

Payment accepted by check or USPS money order. Checks will be held ten days to clear before merchandise is shipped. Please add \$0.50 shipping for one or two sets, \$1.00 for 3-7 sets, \$3.00 for 8-14 sets or \$4.50 for up to 35 sets. Contact us for International shipping and handling costs.

Diagram books for the GM&O and some of the predecessor roads are available or in preparation. Diagram books will be available for both steam and diesel locomotives, freight cars and passenger cars. It is projected that track profile books will also be made available. **These items are produced as they are needed so preparation time should be allowed for. Normally, production should not take more than a week - but if there is a question, please contact us.**

Prices are postpaid except for International orders. Contact us for International shipping and handling costs.

Diagram Books and Drawings

- GM&O-71. \$22.00
Diesel Locomotives Diagrams and Data. This book is reproduced from copies of the original diagram sheets along with added sheets to represent diesels that were added to the fleet but the book wasn't updated. Contains 35 diagram pages, 4 pages of information and front and back covers, 11"x 5".
